DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Ortega on 10/29/2004.

The application has been amended as follows:

Cancel claims 2 and 55-58.

Allowable Subject Matter

Claims 1 and 3-54 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

None of the prior art teaches a target irradiation system having in combination with the other required components a target object capable of becoming radioactive upon receiving emitted x-rays as claimed in independent claims 1, 41, 46-48, 51 and 54.

Claims 3-30, 42-45 and 49-50 are allowed by virtue of their dependency.

None of the prior art teaches an apparatus for irradiating a target object having a positioning assembly including a rotatable carousel with an axis of rotation and a radial edge, and the rotatable carousel including an x-ray conversion target activated by the beam of electrons to emit x-rays and at least one target object mounting station which is receiving x-rays emitted by the x-ray conversion target as claimed in independent claim 31.

Claims 32-40 are allowed by virtue of their dependency.

None of the prior art teaches a method of irradiating a target object having in combination with the other required steps, the step of selecting a target object capable of becoming radioactive upon receiving emitted x-rays as claimed in independent claims 52 and 53.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lindsky et al. (US 5784423) teaches a target object becoming radioactive by receiving x-rays using push rod transportation but fails to teach the allowable subject matters above.
